

# GRANITE TREE RING

## INSTRUCTIONS / MATERIALS

ENCORE  STONE  
P R O D U C T S

48" Outside Diameter  
36" Inside Diameter  
10" High  
117 Stones in Kit (5 extra)  
14 Stones per row.  
8 Rows High (1.25" per row)

### MATERIALS NEEDED:

- Shovel
- Level
- Tape Measure
- Paver Base
- Construction Adhesive
- Gloves
- Mulch/Dirt
- Spray Paint
- Chalk
- Tamper
- Silicone Gun
- Rubber Mallet

### ASSEMBLY STEPS

1

Select location for your Tree Ring, if using lawn/dirt location mark a 48" circle on surface and dig 2" down. Use level to ensure your base is even.

2

Put approx 2" of paver base into your circle - this MUST be tamped level before laying Encore Stones.

3

Select 14 stones you will use for your top row and set them to the side.\* Then take 14 more stones and lay them on top of (the outer edge) of paver base- rough side facing up. Stones will have small gaps between joints when laid; which allows for drainage.

4

Once the first row is laid, apply a bead of construction adhesive to middle of stones and lay second row on top of first row (always rough side facing up), staggering joints as shown in picture above.

5

Repeat step #4 for rows 3-8, using the first 14 pieces you set aside for row #8 (Don't forget- install rough side up). Stop every 2 rows and use rubber mallet to tap any pieces that may have shifted before the construction adhesive fully cures.

6

Once Tree Ring is built, add bags of mulch or dirt (whichever you prefer) to center and installation is complete. Before using- check construction adhesive tube for exact cure time.

\*Rough side up is recommended for top row
